How to use this planting schedule:

- This handy schedule can be used to keep track of feeding your seeds, seedlings, and transplanting to the garden
- Write the date in the growth period and maintenance sections, so you know your garden is as well fed as possible
- In the 'harvest' box, you could write the date, the yield or a smiley face! Whatever you like really!
- You could put this on your fridge as a quick reference guide to when your plants will next need an Organic Magic top up.
